### **DETAILED ACTION**

This Office Action supersedes all previous communications received from the Patent Office.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 4, 6, 7 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 3, 4, 6 and 7 (at the beginning of the claims) “post” is nonsensical in the context used. In claim 3, 3<sup>rd</sup> to the last line from the bottom, “the perimeter piece extending over a portion of the first sheet material” has no antecedent basis. Since the relationship is being defined by the language “extending” should be replaced by --extends--.

In claim 4, line 6 “plastic” lacks clear antecedent basis.

In claim 21, last line, the word --a-- should be inserted after “than”.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Jordan (Patent no. 5,226,384). Jordan discloses a mattress (12) covered by first and second sheets (14). The first and second sheets are joined together about the mattress by adhesive tape (18) and stitch (20), and a perimeter piece (23) is positioned about the perimeter of the mattress and is joined with the first and second sheets by stitch (21). Jordan anticipates all claimed structures.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jordan (Patent no. 5,226,384). Jordan discloses the claimed subject matter except for the perimeter piece attached by adhesive. It would have been obvious to one skilled in the art at the time the invention was made to substitute the stitching by the use of adhesive as the joining means. The modification is merely a substitution of a well-known means of joining materials. Also, the modification would eliminate the generally more labor intensive stitching.

***Allowable Subject Matter***

Claims 2, 3, 5, 7-10 and 21-24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 11-16, 18-20 and 25-30 are allowed.
